

Input	121
n_digits	$\text{floor}(\log_{10}(121)) + 1$
eff_mid	$\text{floor}(n_digits/2)$
arr	[] size equal to mid + k
k	isOdd constant

Input: "1221"

121 mod 10 = 1

$\text{floor}(\frac{121}{10})$

12 mod 10 = 2

$\text{floor}(\frac{12}{10})$

1 mod 10 = 1

$\text{floor}(\frac{1}{10})$

0

Input: "121"
